**INSTITUTIONAL DEVELOPMENT PLAN 2018-2020**

To strengthen support to existing R&D Centers, research clusters and newly-established research centers in the university	Hire qualified R&D personnel	Invite and recommend qualified R&D personnel	Research Sector	2018 - 2020	
	Procurement of at least 3 R & D software and databases within 3 years	5% increase of the university research budget/funds annually			
	Procurement of publication software and hardware within 3 years				
To promote synergy and collaboration of the research and academic sectors of the University	Procurement of laboratory equipment and supplies annually				
	Co-organized at least 4 professorial chair holder lectures every year	Recommend professorial chair holder	ISSD, ISTR, ICLS, ILIR	2018 - 2020	
	Co-organized at least 4 national research conferences, seminars, trainings, workshops, lectures, fora, etc. with the concerned college/branch completed within 3 years	Constitute working committee composed of research and academic representatives	ISSD ILIR ICLS IDSA	Q3 2018 - 2020 Q4 2018 - 2020 Q4 2018 - 2020 Q2 2018 - 2020	
To pursue excellence in research production of faculty and researchers	Professorial chair holder lecture monograph series published annually	Publish Trends and Insights annually	PO with co-organizing institute/s	Q3 2018 - 2020	
	A minimum of 5 research proposals submitted for external funding per year.	<ul style="list-style-type: none"> <li>Regularly submit research proposals to the external funding agency</li> <li>Conduct research writeshop</li> </ul>	ISSD ISTR ILIR ICLS RMO	2018 - 2020	
	A minimum of 3 multi-disciplinary research projects completed during the 4-year period and funded by PUP	Regularly submit research proposals for internal funding	ISSD ISTR ILIR ICLS RMO	2018-2020	
100% of the research projects completed as scheduled	Regularly monitor research projects			2018 - 2020	
A minimum of two (2) consultants/experts to serve as mentors/referees in research undertakings every 5 years	Invite consultants/experts to serve as mentors/referees in the research undertakings		ISSD ISTR ILIR ICLS	2018 - 2020

2. PUP INSTITUTIONAL PLAN FROM 2012 TO 2016

Vice Chair De Guzman presented to the Board for approval the PUP Institutional Plan from 2012 to 2016 through a power point presentation.

Vice Chair De Guzman started the presentation with the history of the Polytechnic University of the Philippines.

The PUP started in 1904 as Business School, Philippine School of Commerce in 1908, Philippine Normal School of Arts in 1933, Philippines College of Commerce in 1952 and Polytechnic University of the Philippines in 1978-up to present.

The PUP has branches and campuses in the Island of Luzon. We have campuses in Mindoro, in Bansud and Sablayan. The Branches are GAA funded. Meanwhile, the campuses are funded by the Local Government so there is a distinction between branches and campuses. The other branches are located in Taguig City, Quezon City, Bataan, Lopez-Quezon, Mulanay-Quezon Maragondon-Cavite, Sto. Tomas-Batangas, Ragay-Camarines Sur, and General Luna-Quezon which is an annex of the Mulanay branch and of course San Juan, which is one of the newest.

Chairperson Licuanan inquired as who funded the San Juan Campus. Vice Chair replied that the Local Government of San Juan totally funded all the expenses of PUP San Juan. He also informed the Board that the San Juan Campus already had its first batch of graduates last year; that the City Mayor was very proud because they had 100% passing rate in Accountancy.

Vice Chair shared that the University also has a campus in Paranaque City, offering associate programs. The campus in Sta Maria-Bulacan is bigger than the old campuses. There are also campuses in Pullilan, in Cabiao-Nueva Ecija, which is the last outpost of PUP in the North-Cabiao and likewise in Biñan.

He informed the Board that Biñan campus is no longer accepting enrollees this coming school year because the Mayor decided to shut down the branch.

Associate programs are being offered in Sablayan-Occidental Mindoro and Bansud, the farthest in the South and they have good facilities. We have an annex in Calauan and in Rizal, campuses in Sta. Rosa and San Pedro, Laguna. The University is doing well in the programs particularly in Maragondon and in Lopez, our regular branches and Bataan as well.

Vice Chair said that PUP is the country's first Polytechnic University. Chairperson Licuanan remarked that Regent Fortuna always raised the issue of what it means to be a Polytechnic University and how PUP is unique in that sense because the explanation seemed to be moving towards PUP as being a professional school.

EXCERPT FROM THE MINUTES OF THE SPECIAL MEETING OF THE BOARD OF  
REGENTS HELD ON APRIL 5, 2013 AT 9:00 O'CLOCK IN THE MORNING AT  
CHED CONFERENCE ROOM, 4<sup>th</sup> FLOOR, HEDC BUILDING, C.P. GARCIA  
AVENUE, U.P. CAMPUS, DILIMAN, QUEZON CITY

Vice Chair De Guzman said that the Polytechnic is an institution that produces professionals like Doctors, Engineers, Accountants, Teachers, but the idea is telling the public that we are the first Polytechnic University. He also informed the Board that the University is the current holder of the Guinness Book of World Records in forming the world's largest human rainbow.

The University has been declared as an IT Zone- Microsoft Certified Government Technology Education Center, the State University with the highest number of programs accredited by AACCCUP.

Regent Tanasas asked the Vice Chair what it meant by being an IT Zone. Vice Chair replied that PUP is the only State University apart from U.P. which has an information System. This means people can enroll online, pay online and at the same time process transactions which is now being done using a program, a system or a software. This coming semester, the faculty will be evaluated via online as well.

Regent Fortuna said that in fairness to the PUP, the students are outstanding. That is why she suggested Vice Chair to equip them with state of the art equipment.

Vice Chair also informed the Board that the PUP Open University is recognized by UNESCO as Asia Pacific's knowledge base in open distance learning since 2010. The PUP is the only State University aside from UP who offer courses online, a combination of online and offline courses. We have 100% compliance rating by CHED Technical Panel on Distance and Trans-National Education. He also said that PUP is now a Center of Development in Journalism and candidate for the Center of Development in Broadcast Communication.

He informed the Board that the PUP is 1<sup>st</sup> place in the ECE Board Examination and 2<sup>nd</sup> place in Architecture and 3<sup>rd</sup> place in Electrical, 6<sup>th</sup> place in EE and CE Board Exam, 8<sup>th</sup> place in CPA and 10<sup>th</sup> place in Registered Mechanical Engineering (RME).

- Graduation data. Graduates in the most recent school year are more than 7 thousand in the main campus and more than 4 thousand in the branches. The PUP has more than 11 thousand graduates a year.

- The Vision of the University. PUP is clearing the paths to transform the Polytechnic University of the Philippines to an Epistemic Community.

Vice Chair De Guzman presented to the Board the 8 points agenda of his administration.

**Agenda # 1 – PURSUING ACADEMIC EXCELLENCE THROUGH DISCIPLINED INTEGRITY**

- He said that this agenda has 15 objectives, 68 programs, project and activities required by a budget of Php1.044 Million in 2012 and Php1.148 Million in 2013.

REGENTS HELD ON APRIL 5, 2013 AT 9:00 O'CLOCK IN THE MORNING AT  
CHED CONFERENCE ROOM, 4<sup>th</sup> FLOOR, HEDC BUILDING, C.P. GARCIA  
AVENUE, U.P. CAMPUS, DILIMAN, QUEZON CITY

- He said that the objective of this agenda is to ensure globally focused, research oriented and internationally competitive curricula in the undergraduate and graduate levels, to promote and maintain quality assurance, to enhance the graduates' performance in professional licensure and Bar examinations, to provide cognitive and comprehensive learning opportunities that will raise students' scientific and communicative skills, comparable to counterpart in other countries and to improve the quality and profile of the faculty.
- He informed the Board that the faculty enrollees in the graduate school doubled because of the policy implemented by the administration, which is "no masters degree no tenure." Otherwise, they are going to lose their temporary status.
- He said that in 2011-2012, we had 34 in Doctorate program, 133 in Masters program and 1 in Bachelor of Laws. For the current year, we have 48 in Doctorate program, 105 in the Masters program and 1 in Bachelor of Laws.
- In addition to the aforementioned objectives: to adapt academic programs to meet the demands of domestic and global market, to produce globally competitive graduates, to enhance PUP image as a destination of choice for degree and non-degree seeking international students, to develop a holistic student development program, to develop programs and projects that will enhance student services.
- Still agenda No. 1, to produce exemplary scholar and then recipient of financial grants who have demonstrated the highest standards of academic excellence and scholars aptitude and character, to rationalize the existing scholarship financial assistance programs, to strengthen the status of the PUP Open University as a strong open distance learning institution, to strengthen PUP as CHED deputized Higher Education Institution (HEI), offering Expanded Tertiary Education Equivalency and Accredited program or ETEAPP, to develop assessment tools and communication plan and to increase the number of enrollees and graduates under the ETEAPP.

Agenda # 2 – EMBEDDING A CULTURE OF RESEARCH

- This agenda has 11 objectives and 54 programs, projects and activities. These are for a budget requirement from 2012 and 2016.
- The objectives are: to contribute to the country's national development through a focused university research program; to strengthen support to existing R&D Centers research cluster and newly established research centers in the university; to promote synergy and a sound capability program in each of the colleges, campuses and branches through collaboration of the research and academic sectors of the university; to pursue excellence in research production of faculty and researchers; to pursue excellence in research presentation and publication; to pursue excellence in creative works; to pursue excellence in student researches; to develop strong research linkages and partnership with other national and international institutions and organizations; to support economic growth through solution of mismatch between education and industry needs; to support economic, environment and social growth through production of quality research outputs with probable technology transfer and to make research extension and training opportunities available to all interested faculty and students.

Agenda # 3 – ASSURING TRANSPARENCY AND PARTICIPATORIES IN GIVING REWARDS AND SANCTIONS

- This agenda have 3 objectives and 13 programs with those public requirements.
- Vice Chair said the objectives are: to institutionalize an open transparency and participatory governance; to review and implement the reward system set by the appropriate government bodies to reflect unit and individual contribution to the university overall mission of teaching research services and production; and to promote international exposure and activities such as faculty and staff exchange program scholarship and attendance in conferences.

Agenda # 4 – MODERNIZATION AND UPGRADING OF PHYSICAL FACILITIES, EQUIPMENT LIBRARY AND CAMPUS DEVELOPMENT

- This agenda have 9 objectives, 34 programs, projects and activities requiring those budgets for 2013 Php17.8 Million; for 2014 - from Php17.8 Million to Php504, Php785 and Php135 thousand for modernizing the library and for physical facilities of the University.
- The objectives for this agenda are: to expand state of the art campus development programs; to modernize, upgrade existing facilities and purchase new ones; to utilize ICT facilities/equipment to enhance the overall operation of the university; to start up an open-library system to complement an upgraded e-library; to provide adequate hardware and software resources to support staff, students and faculty in instruction, research extension and

production; to maximize delivery programs through the use of ICT; to strengthen use of technology to improve administrative efficiency and effectiveness; to integrate appropriate ICT with instruction, research production and community service and to implement with vigor the University Zero Waste Management Program.

- He informed the Board that the Administration has a project which is to have open shelves in the library. He promised to develop or upgrade the e-library.

**Agenda # 5 - RECONCEPTUALIZATION OF ACADEMIC FREEDOM**

- The agenda consists of 4 objectives and 10 projects and activities requiring those budgets from 2012 to 2016.

- The objectives of the agenda. To establish and foster a climate of academic integrity in the exercise of academic freedom; to exercise academic freedom in the research, publication and other scholarly pursuits; to become effective teacher and employees and to create venues for sectoral involvement in decision-making.

- Vice Chair wished that the burning of the chairs is not part of Academic Freedom.

**Agenda # 6 - INSTITUTIONALIZING CIVIL SOCIETY ENGAGEMENT AND INVOLVED EXTENSION OF SERVICES PROGRAMS**

- There are 8 objectives and 49 programs with those budget requirements.

- The objectives for this agenda. To pursue excellence in extension services; to sustain and strengthen the university, colleges campuses/branches tie-tips with local barangays in their communities; to establish a system of recognition, rewards and incentives for best practices in extension services that have impact on the needs of the communities served; to provide students greater opportunities to strengthen their social awareness and involvement, volunteerism and advocacies; to address societal needs related to improvement of the quality of life through extension and community service and technology transfer; to take the lead in building partnership, linkages and other twinning arrangement with industries, the government and other education institutions; to establish alumni contracts throughout the country and the world to ensure that the alumni are well-informed of and regularly consulted about roles they need to perform in building and enhancing the PUP public image; and to develop and implement an excellent communication system to dissemination and promotion of extension and community involvement program.

**Agenda # 7 - FISCAL RESPONSIBILITY**

• There are 9 objectives and 15 programs, projects and activities with those budget requirements.

• The objectives of this agenda: To ensure transparent, effective and efficient fiscal management; to ensure the timely release of funds for projects and activities; to implement the efficient and effective procurement system; to implement a responsive and efficient Financial Management Information (FMIS); to explore possible sources of additional benefits for faculty members and employees; to rationalize structure and programs of fees; to develop business plans for production and income generating projects; to strengthen other existing projects that augment the IGP capabilities of the University; and to promote and establish a strong fund campaign for the generation of additional resources and funding opportunities for scholarship, research grants and other development projects.

**Agenda # 8 - ASSESSMENT OF INSTITUTIONAL PROCESSES AND CRITICAL RATIONAL REVIEW OF THE ENTIRE ORGANIZATION**

• This agenda consists of 2 objectives with those budget requirements.

• The objectives. To refocus and realign institutional capabilities to university's current vision, strategic goals and priorities and to review and implement the reward system set by appropriate government bodies to reflect unit and individual contributions to the university's overall mission of teaching, research, service and production.

According to Vice Chair De Guzman, this is the summary of all the objectives and budget requirements, which are all part of the personal services.

He informed the Board that the PUP had already submitted a budget ceiling to the DBM amounting to Php2.1 Billion. The ideal budget for PUP, considering the population, will start the process of transforming the University into what we envision it to be-- to follow the national and international standards.

Comments & Suggestion of the Board of Regents:

Chairperson Licuanan said that there is improvement. PASUC has been very much involved to reflect certain things like for instance, enrollment in the priority and over-quality areas. The same number of points cannot be credited for just formed bodies. It has to be in certain areas. This may be called fidelity to mission. Mandate is another thing trying to be operationalized. She said they have to help PUP find identity, identify its character and main areas—its niches as it work.

Regent Fortuna suggested the inclusion of something related to intellectual property. This will encourage the researchers to have their works patented. She stated that PUP is part of the ITSU, wondering why they cannot re-activate PUP in ITSU. Vice Chair replied that PUP is currently applying for the patent to one invention.

Regent Songco has an observation, that PUP must find its objectives around the strategies to be able to attain it. She said there should be a clear definition of what the objective is, what the goal is, what the strategy is, what the facts, programs, projects and activities are since there is a confusion. As an example she mentioned the first objective which would be to come up with scholarships, programs and the like. She doesn't think those are objectives but those are already strategies that gain the objectives.

Vice Chair De Guzman informed the Board that the management has two projects which is the open shelves in the library and the development or upgrade of our e-library.

Chairperson Licuanan questioned the Vice Chair De Guzman and other SUC's why SUC's would put a premium in any form to foreign students. She also finds it questionable the role of foreign students and what justifies the foreign student enrollment in a state funded institution? In response to Chairperson Licuanan, Vice Chair said that the primary reason is because they pay more.

Regent De Leon suggested to Vice Chair De Guzman to mobilize the alumni to provide support to the PUP, mentioning Mr. Taniasas as a successful alumni, therefore he thought he should pay forward also. In this way, the PUP can harness the successful alumni. She said that the successful students who have already graduated can come back and say... "that I'm now fulfilled upon to be able to give more scholarship because I believe that the Polytechnic University of the Philippines should already by this time have such huge scores of people who could not... who are people who are no longer poor." Poor no more as they say because the education in PUP fills and she thinks it is going to be excellent.

EXCERPT FROM THE MINUTES OF THE SPECIAL MEETING OF THE BOARD OF  
REGENTS HELD ON APRIL 5, 2013 AT 9:00 O'CLOCK IN THE MORNING AT  
CHED CONFERENCE ROOM, 4<sup>th</sup> FLOOR, HEDC BUILDING, C.P. GARCIA  
AVENUE, U.P. CAMPUS, DILIMAN, QUEZON CITY

Vice Chair De Guzman informed the Board that one of the alumnus, Mr. Noel Gonzales, is proposing to build a high school complex in PUP. Chairperson Licuanan asked Vice Chair De Guzman why is he building a high school. Vice Chair De Guzman replied that the person would like to put up a new building for the PUP Laboratory High School (PUPLHS).

He also informed the Board that Mr. Noel Gonzales and Mr. Fernando Martinez who is the President/CEO of a small player in a petroleum industry, are joining hands in mobilizing the core of the alumni who will fund the new building for the PUPLHS. The Vice Chair likewise informed the Board that the University had established an office for alumni affairs. This office however is not part of the federation of the alumni.

Regent Tanasas asked Vice Chair De Guzman if this is another department in the University. Vice Chair De Guzman replied in the affirmative and said that the function of this office is to communicate with the federation and to track down PUP alumni specially those who have been successful in their respective fields and encourage them to extend any form of assistance to the university. The first project is to communicate with the best graduates, those who are successful, and see what they can do for the university.

Regent Dela Torre said that he remembers that the previous administration was very kind to the position of PUP regarding renewed energy. The whole field of energy is huge and the University has to deal with DOE and DOST and the University must position itself and then find the niche. He asked Vice Chair De Guzman why there is no mention of energy or any of its field like General Physics in the development plan but he believes that there is something about ADB or solar energy.

The Vice Chair replied that the University is still pursuing the solar panels to be built in PUP with the help of and in partnership with ADB.

Regent dela Torre continued and gave examples like the rural electric cooperatives with MEYA which conducts continuing programs of training in related fields of engineering, short courses and academic works. There are works with the MEYA, Mega Electric Cooperatives and the private distribution utilities, transmission and generation and the big players are coming in to this.

EXCERPT FROM THE MINUTES OF THE SPECIAL MEETING OF THE BOARD OF  
REGENTS HELD ON APRIL 5, 2013 AT 9:00 O'CLOCK IN THE MORNING AT  
CHED CONFERENCE ROOM, 4<sup>th</sup> FLOOR, HEDC BUILDING, C.P. GARCIA  
AVENUE, U.P. CAMPUS, DILIMAN, QUEZON CITY

Vice Chair De Guzman said that funds for energy development plan may come from the Malampaya. It will be donated to PUP by the Department of Energy and this is a Php100M project which has already started even during Dr. Guevarra's administration wherein the Vice Chair was part of the committee spearheading the project as he was still in research before he became President. Mr. Fernando Martinez was mediating between PUP, DOE and Malampaya and there were already funds allocated for it but were only stalled because of the political turmoil in PUP which led to the selection of a new President but the University is optimistic that in the next semester, the University can start the project for the building of the NATGAS Institute. The budget of Php100M will be divided. The Php50M is for the building and the other Php50M will go to the operations. The University will send scholars abroad and come back and teach. They can now afford the curricular programs for NATGAS and other renewable energy programs.

Regent Fortuna had received information that the PUP has good people and the University is offering courses like Meteorological Engineering. Vice Chair De Guzman replied that as of now PUP has no meteorological course. Regent Fortuna suggested to the Vice Chair to start with the modular approach either with De La Salle or U.P. and then you find your niche.

Vice Chair replied that he merely inherited the system and that it is not that simple to close a program because there are people attached to the program in terms of livelihood and of course the career of tenured faculty members.

Regent Fortuna said that she is not saying the University needs to close the program. Since the University has good people, the University can go on a modular approach, one needs only to see which courses or subjects are not being offered by the University and are offered by other universities and the University can start from there.

The Vice Chair informed the Board of his intention to re-open the Railway Engineering in the next school year and that he transferred one section from the College of Business to the Railway Engineering because the University has the necessary expertise on the said program. Regent Fortuna then said that she was actually surprised and elated when she heard that PUP has the Railway Engineering program which really reflects that people from PUP are indeed good.

Regent Fortuna further suggested to the Vice Chair to further strengthen what PUP has and not what it doesn't have because the other schools do not have it.

POLYTECHNIC UNIVERSITY OF THE PHILIPPINES  
COLLEGE OF ENGINEERING  
**COMPUTER ENGINEERING DEPARTMENT**

Republic of the Philippines  
POLYTECHNIC UNIVERSITY OF THE PHILIPPINES

EXCERPT FROM THE MINUTES OF THE SPECIAL MEETING OF THE BOARD OF  
REGENTS HELD ON APRIL 5, 2013 AT 9:00 O'CLOCK IN THE MORNING AT  
CHED CONFERENCE ROOM, 4<sup>th</sup> FLOOR, HEDC BUILDING, C.P. GARCIA  
AVENUE, U.P. CAMPUS, DILIMAN, QUEZON CITY

Regent dela Torre suggested that after the University has done its development plan, a second initiative be made based on this. There were indeed problems due to change of management but the focus of this group is to identify the needs of the University; it is likened to a blue oceans study, theoretically PUP should have the framework and work closely with relevant national government agencies because they have their strategic plans and HRD plans and thereafter look at SUC's then at UP and then PUP. People should think that after UP there is PUP. People should not view PUP as merely the largest university but that it has other privileges. The second layer must be developed and these are experimental and pioneering. There is a developmental process and therefore it is suggested that a small task force be created to focus on this.

Regent dela Torre stated that the University only have to choose a few and not too many. It is the future that should be established, the future that's already starting now. Regent dela Torre understands the University's strategic planning process but the University have to consider the givens and you start to rationalize the givens but sometimes rationalizations includes developing new ones but are not yet in the immediate structure or horizon so the question is how will it be funded and who will work for that and it is for this reason that the modular approach will not always be feasible for the University.

Vice Chair De Guzman replied that because the University is operating on this particular given budget for instance, he saw that the University have too many sections funded in a particular college such as the College of Business which has too many students. And to address this situation the Vice Chair migrated sections from the College of Business to the potential programs in the Engineering.

The Chairperson agreed and stated that it is indeed an over subscribed area.

Vice Chair further stated that the railways are going to be very prominent in the future and is a potential program. PUP has been doing its best to achieve its goals despite the lack of budget. To augment the lack of budget, the University tries to look from appropriated funds from somewhere and transfer them to another. He likewise stated that he does not know of a modular approach that does not require new money or generate its own money to favor itself.

POLYTECHNIC UNIVERSITY OF THE PHILIPPINES  
COLLEGE OF ENGINEERING  
**COMPUTER ENGINEERING DEPARTMENT**

Republic of the Philippines  
POLYTECHNIC UNIVERSITY OF THE PHILIPPINES

EXCERPT FROM THE MINUTES OF THE SPECIAL MEETING OF THE BOARD OF  
REGENTS HELD ON APRIL 5, 2013 AT 9:00 O'CLOCK IN THE MORNING AT  
CHED CONFERENCE ROOM, 4<sup>th</sup> FLOOR, HEDC BUILDING, C.P. GARCIA  
AVENUE, U.P. CAMPUS, DILIMAN, QUEZON CITY

Regent Fortuna said that there are many courses which are not being offered in the country. They needed to send scholars abroad to take up those courses. In modular programs, there are subjects or programs which the University do not offer but are already available in other schools. The University has good people in it and the university has to go on in a modular approach. The University must look which subjects are not being offered but are offered in DLSU or in U.P. and have a tie up with them. Regent Fortuna said that it is at this time that she learned of the Railway Engineering of the University and told herself, "Magaling din pala ang PUP."

Chairperson said that this new program that was created with several SUC's plus the observatory and the PAGASA is similar to the modular approach. The universities get the strengths of different institutions and put it together to create a new degree program.

Regent Songco said that what everybody is trying to point out is for PUP to develop its core competencies, its niches whether existing or for the future. The University has looked at the landscape but the University has not done an honest to goodness evaluation of where it should be because some of the courses that may be offered may also be available in other schools.

Chairperson Licuanan stated that that would be the next phase. Regent Songco agreed and stated that it is a developmental plan. Some may be stopped, scaled down. The University has resources and then bark on new areas. It is a matter of name recall, saying "PUP yan" and it is PUP who has that program but this could be implemented next year.

Vice Chair De Guzman replied that the PUP has its mandate to offer programs such as Accountancy and Engineering.

Chairperson said that the Vice Chair has rationalized what he had inherited from the previous administration, so basically this is the first step of the President. The Chairperson admits and it is true that the University cannot simply close a program but it can be done gradually in that direction by amalgamating what has been done already and pursuing the same further.

Regent Fortuna told Vice Chair De Guzman that the PUP can tap expert from the National Government. The University can tap experts from PAG-ASA, DOE, DOST. These experts can be hired as part-time teachers also and for sure no matter how small it is these experts will extend their assistance to the University. The University needs critical HR people who can bring and run the show.

POLYTECHNIC UNIVERSITY OF THE PHILIPPINES  
COLLEGE OF ENGINEERING  
**COMPUTER ENGINEERING DEPARTMENT**

Republic of the Philippines  
POLYTECHNIC UNIVERSITY OF THE PHILIPPINES

EXCERPT FROM THE MINUTES OF THE SPECIAL MEETING OF THE BOARD OF  
REGENTS HELD ON APRIL 5, 2013 AT 9:00 O'CLOCK IN THE MORNING AT  
CHED CONFERENCE ROOM, 4<sup>th</sup> FLOOR, HEDC BUILDING, C.P. GARCIA  
AVENUE, U.P. CAMPUS, DILIMAN, QUEZON CITY

The Chairperson stated that if the University has special ideas that are exciting then there would be no problem in securing money in general. And there is no way that PUP will be closed so it has to be made great and invest on it. PUP is a major Philippine Institution, hence we must find its strength and market it and look for funds since the Vice Chair had promised the students that there will be no increase in tuition so the University must find money elsewhere.

Moreover, Regent Fortuna added that the PUP has its mandate and that it is a polytechnic university, the first polytechnic university in the country.

Regent Songco further added that the DBM is receptive to any request as long as the same is justified and as long as it can be shown what the university can do. The DBM would not just give it to anybody. As to the different institution development plans on the capacity building programs of the University's faculty, the University can partner with the different agencies, for example, in the region, we had partnered with other SUC's like when there is a need for assistance in in-fact evaluations of different government projects. It is the scientific way of doing evaluation of the projects to determine whether or not it should proceed, stop some of them or come up with new ones. We are training the SUC's to help us in undertaking the in-fact evaluation like in Bicol and Region 8, different SUC's had been tapped and the University can also do this so that it will not solely rely on the GAA and other modalities.

Chairperson realized that the Vice Chair cannot do this on his first year in managing PUP. Vice Chair replied that he has already taken initial steps towards setting up the fundamentals for a national state university and the university is now in the second stage of the process.

Regent Dela Torre suggested a simple framework which he calls the 3 A's. The first A is what are you simply affirming? And in the affirmation you might already been negotiating for additional resources. The second A is the crucial one, what are we adding? This is new and what are we adding. And the third is the more painful one, what are we altering. In altering, we are dropping something or fixing it.

After a long deliberation, Vice Chair De. Guzman moved for the approval of the PUP Institutional Development Plan 2012-2016 subject to all comments, suggestions and revisions.

Upon motion duly seconded, the Board gave an initial approval of the PUP Institutional Development Plan, 2012-2016 subject to revisions to find the core/niches which PUP can explore that will make it more relevant and responsive to the changing time.
