EXTENSION MANAGEMENT OFFICE

VISION

The Extension Management Office envisions itself to be the epitome of excellence in uplifting the citizenry's quality of life by fostering economic and social resilience through concrete, innovative, community outreach and research-based extension programs.

MISSION

The Extension Management Office (EMO) is the lead unit of PUP in formulating and implementing the extension policies, guidelines and programs in line with existing policies in CHED designed to ameliorate the pressing social needs by rendering various expert services to its target recipients and immediate communities. Hence, in order to carry out the mission to empower citizenry for sustainable development, the EMO commits itself to:

- 1) Engage in unified extension undertakings tapping the technical expertise of different colleges, branches, campuses and other offices;
- 2) Promote high sense of volunteerism among the faculty, administrative staff and studentry towards service to the target recipients;
- 3) Reshape the community extension programs and services to better meet the actual needs of target recipients;
- 4) Rebuild and transform lives of partner communities and beyond for the greater good of mankind;
- 5) Ensure active participation in intensified national advocacy for poverty reduction and social development.

OBJECTIVES

EMO has arrived at similar specific objectives in order to fulfil its mission to:

Formulate appropriate quality extension services through community needs identification, project preparation and implementation.

Deliver greater access to education and digital information by making full use of vital resources and technologies.

Expand capacity development programs that cater the recurring needs of the immediate communities.

To provide avenues for the entire university to unite, collaborate, and participate in all extension-related undertakings to achieve the shared vision of sustainable development for a better future.

Establish linkages and connections with LGUs, NGOs, private sectors, target industry partners as well as national/international organizations/institutions/agencies to realize plans for expansion as well as generate financial support for university extension projects.

OFFICIALS

JOSEPH MERCADO, DEM, PhD
Vice President for Research, Extension, and Development

SILVIA C. AMBAG, DEM
Director, Extension Management Office

RATIONALE

For more than a century, the Polytechnic University of the Philippines has produced many of the country's manpower and workforce. Being the largest state university in the country, PUP promotes quality education to a greater mass of people through its quality and affordable academic programs.

PUP is also a civic oriented institution that offers expert services and extension programs to the needy and marginalized groups of the society. This willingness to serve the community and society is embodied and highlighted in the 8-point agenda of PUP President, Dr. Emanuel C. De Guzman on Institutionalizing Civil Society Engagement and Involved Extension Service Program.

Extension is one of the major thrusts of PUP. As such, PUP's continuing efforts in eradicating poverty is pivotal in its extension programs. This thrust is attuned to the attainment of the country's development goals. The University, with its numerous partnerships and projects with stakeholders, benefited countless recipients of its extension programs. Some of its initiatives are adopt-a-community and village renewal program, countryside development for the poor through promotion and organization of cooperatives; technical, business and livelihood assistance given to groups and/or marginal sector of the society.

A portfolio of relevant trainings ably handled by knowledgeable and competent university trainers/experts serves as the blueprint of extension work offered by this institution.

The mandate of the University's Research and Extension Management Office(REMO), the projects of the various units of the University are centralized and anchored on assisting and empowering communities and groups through the proper handling and transferring of technologies i.e. material or expertise.

The University extension project dubbed as **Salin-Kaalaman, Tungo sa Kaunlaran** project - is an integrated faculty expert transfer of technology designed to provide basic information and knowledge to identified community and other institutions needing expert services from the faculty trainers of the University. The project is recognized and endorsed by the Philippine Association of State Universities and Colleges (PASUC)

TARGET BENEFICIARIES

The project is currently implemented in twenty three (23) Barangays in Sta. Mesa, Manila and will be replicated in selected extension campuses of the University. Project beneficiary includes the barangay officials, household parents, out-of-school youth, indigent children and special groups. Trainings to be given are divided on the following areas:

- Livelihood and skills training
- Basic literacy
- Health and wellness
- Environmental and
- Special training topic for special groups

PROJECT MANAGEMENT

Presently, the Research and Extension Management Office (REMO) through the Center for Extension Management Services is in-charge of the project in coordination with the Community Relations and Extension for Development Office (CREDO). Faculty-experts coming from various colleges and departments render voluntary service in the implementation of the project.

PROJECT PARTNERS AND COLLABORATORS

PUP are inviting multi-sectoral groups as its project collaborators which come from the government sector, NGO's and other private organizations. The University enters into a Memorandum of Agreement with its partners to delineate roles in the project

FUND SOURCING

Currently, the University utilizes its fund to execute the project. However, external funding and cost-sharing arrangement are also made to sustain the project.
